

ASG TO DELIVER SECURE CLOUD AND UNDERPIN DIGITAL TRANSFORMATION AT AIRSERVICES AUSTRALIA

ASG Group Limited is pleased to announce it has secured a strategically significant contract with Airservices Australia.

This landmark contract will see ASG provide Airservices with a Secure Cloud platform and full 'Desktop as a Service'.

The contract has an initial value of \$84 million, with a term of five years and another five-year option.

ASG will now play a pivotal role in Airservices' business transformation, bringing agility, flexibility and innovation to the platforms that run their key business systems.

ASG Chief Operating Officer Dean Langenbach said the contract was hugely significant for the Company and testament to ASG's expanded capability and capacity following the acquisition of SMS in 2017.

"We are thrilled to have the opportunity to partner with Airservices on what is a truly transformational project," said Mr Langenbach.

"We have brought to Airservices our trademark commercial model, which has agility and flexibility at its core. And with that, our proven capability in cloud transition and business transformation."

Central to ASG's delivery will be the security of the cloud platform, which is being delivered in conjunction with partner Vault Systems, with the highest levels of security control and data sovereignty. This provides Airservices with the assurance that all sensitive data is contained on an Australian Signals Directorate-certified cloud platform.

Mr Langenbach said ASG's extensive experience in establishing 'as-a-service' models proved critical to securing the Airservices contract.

"ASG will be providing best-in-breed technology and service to Airservices, but with the added security and flexibility to scale with business demand and deliver strong economic gains.

ASG begins work on the project in April 2018.
